Business information management: improving performance ...

Business performance management (also known as "corporate performance management" (CPM) and "enterprise performance management") is a set of performance management and analytic processes that enables the management of an organization's performance to achieve one or more pre-selected goals. Gartner retired the concept of "CPM" and reclassified it as "financial planning and analysis (FP&A)," and "financial close" to reflect two concepts: increased focus on planning and the emergence of a new ...
