"A witty and unexpected take on the zombie genre; I had a great time."
—Charlaine Harris, #1 New York Times best-selling author of the Sookie Stackhouse novels Subtitled "A Zombie Memoir," Brains looks at America's favorite walking-dead flesh-eaters from an audaciously original and deliciously gruesome new perspective. Debut author Robin Becker blazes new ground with this story of former college professor-cum-sentient zombie Jack Barnes, who recounts the tale of the resistance he organized in the wake of the recent zombie apocalypse. World War Z; Shaun of the Dead; Pride, Prejudice, and Zombies...

Becker tops them all with Brains—a witty, tasty treat for anyone who every spent a midnight glued to a classic George A. Romero zombie epic!

A user-friendly, step-by-step guide to understanding the mind • Presents a practical journey into understanding consciousness--philosophy's hardest problem, science's final frontier, and spirituality's deepest mystery • Offers 7 steps to transform your life using the shadow and the light of consciousness Consciousness from Zombies to Angels presents a practical, step-by-step "owner's guide" for the mind that sorts out philosophy's hardest problem, science's final frontier, and spirituality's deepest mystery--what consciousness

is, how it works, and why it's important. Christian de Quincey presents seven simple steps for understanding consciousness and how it can lead to spiritual awareness: observe your language, identify the problem, learn how to look, recognize your patterns, know yourself, embrace your shadow, and practice transformation. All of us exhibit both shadow and light, aspects of ourselves we fear and deny (our inner Zombies) as well as qualities we admire and want to radiate (our inner Angels). The key to a creative and fulfilled life is to integrate both. De Quincey reveals that the way to transformation is to accept ourselves exactly as we are--a work in progress. Readers will learn the differ-

ence between “energy talk” and “consciousness talk”; how the body affects the mind, and vice versa; and where to go for help to develop consciousness, heal emotions, or grow spiritually. De Quincey shows how to recognize and break habits and patterns that run your life, how to find out who you really are, and why facing up to your darkest fears will liberate your brightest light as you learn to embrace all of your humanity and experience the power of transformation.

A core philosophical project is the attempt to uncover the fundamental nature of reality, the limited set of facts upon which all other facts depend. Perhaps the most popular theory of fundamental reality in contemporary analytic philosophy is physicalism, the view that the world is fundamentally physical in nature. The first half of this book argues that physicalist views cannot account for the evident reality of conscious experience, and hence that physicalism cannot be true. Unusually for an opponent of physicalism, Goff argues that there are big problems with the most well-known arguments against physicalism: Chalmers' zombie con-

sciousness argument and Jackson's knowledge argument and proposes significant modifications. The second half of the book explores and defends a recently rediscovered theory of fundamental reality or perhaps rather a grouping of such theories known as 'Russellian monism.' Russellian monists draw inspiration from a couple of theses defended by Bertrand Russell in *The Analysis of Matter* in 1927. Russell argued that physics, for all its virtues, gives us a radically incomplete picture of the world. It tells us only about the extrinsic, mathematical features of material entities, and leaves us in the dark about their intrinsic nature, about how they are in and of themselves. Following Russell, Russellian monists suppose that it is this 'hidden' intrinsic nature of matter that explains human and animal consciousness. Some Russellian monists adopt panpsychism, the view that the intrinsic natures of basic material entities involve consciousness; others hold that basic material entities are proto-conscious rather than conscious. Throughout the second half of the book various forms of Russellian monism are surveyed, and the key challenges

facing it are discussed. The penultimate chapter defends a cosmopsychist form of Russellian monism, according to which all facts are grounded in facts about the conscious universe.

Are we more than stardust? Is the appearance of the fragile Earth in the vast universe more than an accident? Are we not children of a Spirit that pervades the dust, rejuvenates life, and embraces

the ever-evolving universe? Is there a cosmic Spirit that wants us to awaken to a consciousness of universal meaning, sacred purpose, and mutual friendship with all beings? This book answers these questions with a spirituality of the numinous in our relation to the elements of the Earth in the matrix of the multiverse by taking you on a journey through nine paths and nineteen meditations of awakening. Not bound by any religion, but in deep appreciation of the religious and spiritual heritage of human encounters with the divine depth of existence in our selves and in nature, they invite you to become sojourners by engaging the most profound embodiments of the intangible Spirit by which it facilitates its own materialization in the cosmos and our spiritualization of the cosmos. Use--says this Spirit--the stardust that you are to become a spirit-faring species in an eternal journey of the cosmos to realize its ultimate motive of existence--the attraction of love!

Examines 21 unquestioned assumptions that cloud our collective consciousness • Reveals faulty thinking and conceptual

blindspots that distort beliefs in science, philosophy, and spirituality--from "the universe exploded from nothing in a Big Bang" to "we create our own reality" • Explains how "thought viruses" spread as we use these clichéd assumptions in our daily communications We live in a world filled with clichés--convenient assumptions and unquestioned conclusions that many of us use without giving them a second thought. We all spread these "thought viruses," infecting everyone we come in contact with. But many of these blindspots in how we think about ourselves and the world do not withstand rigorous scrutiny--or even casual scrutiny in some cases--yet they fall out of the mouths of scientists, religious teachers, journalists, and authors with dumbfounding frequency. Over the years philosopher Christian de Quincey spotted these cognitive gremlins in books, blogs, websites, TV shows, movies, classrooms, and casual conversations--and he wondered: Why do so many people speak before thinking, spreading ideas that make no sense, yet fool us into thinking they do? How did these unquestioned beliefs about life,

space, time, energy, consciousness, evolution, artificial intelligence, and even God take hold in our collective consciousness? In this book, de Quincey deliberately provokes and illuminates the dark side of jumping to conclusions, casting a skeptical eye on 21 beliefs that keep science, philosophy, and spirituality in the dark--from "the universe exploded from nothing in a Big Bang" and "we create our own reality" to "nobody knows what consciousness is" and "everything is energy." These ideas distort and block our understanding and openness to important questions about life, the universe, mind, matter, God, and the miraculous. By exposing these thought viruses that take our minds hostage when we fail to think things through, de Quincey aims to help change the way we think not just about thinking but also about how we live our lives, interact with others, and contemplate the world around us.

In this book David Chalmers follows up and extends his thoughts and arguments on the nature of consciousness that he first set forth in his groundbreaking 1996 book, *The Conscious Mind*.

What do angels think about? Is God a deceiver? How important is happiness? Might zombies exist? Do I exist? Can I survive death? In *Philosophy of the Mind Made Easy* Deborah Wells considers some of the fascinating questions that have occupied the thoughts of some of our greatest thinkers. And she aims to turn you, the reader, into a philosopher of the mind along the way.

Archangel Gabriel has vanished. Lucifer is hiding, waiting for a new chance to attack the Angel community. Kreon, newly turned True Angel and also Lucifer's son, gets shackled by an Archangel's command to kill his father. Will he be forced to comply, or is there another way? An ancient prophecy pushes Kreon to his limits as he tries to change fate, risking the extinction of the entire Angel community.

Hand transplants, pressured gender selection, breastfeeding rituals, biomechanical body parts, eating disorders and angels, *Bigger Than Bones* welcomes the reader into the bizarre and often shocking world of the body's transformations.

Presents an investigation in the claims that yoga

and meditation practices can enhance clairvoyance, telepathy, psychokinesis, levitation, and precognition.

ent ways of knowing--such as feeling and intuition, reason and the senses--in our approach to life • Discusses the technique of Bohmian Dialogue where you can learn not only to "feel your thinking," but also to experience true communion with others In Radical Knowing Christian de Quincey makes a provocative claim: We are not who we think we are. Instead, we are what we feel. Giving disciplined attention to feelings reveals the most fundamental fact of life and reality: We are our relationships. Most of us think we are individuals first and foremost who then come together to form relationships. De Quincey turns this "obvious fact" on its head and shows that relationship comes first, and that our individual sense of self--our "private" consciousness--actually arises from shared consciousness. This shared, collective consciousness is at the heart of indigenous ways of life and their worldviews. De Quincey explains that participating in shared consciousness literally builds the fabric of reality, and that understanding this process is key to unlocking our potential for higher consciousness and spiritual evolution. He presents the

technique of Bohmian Dialogue, developed by groundbreaking quantum physicist David Bohm, as one method for experiencing this powerful process. He also explores the mystery of synchronicity, offering a new understanding of the relationship between matter and mind and the underlying nature of reality.

Through the act of loving yourself, you give the gift of the truth of you to this world. The most powerful way you can be in the world is by loving yourself well and then living your life from that place. The question is: how do you do that? How do you love yourself when faced with overwhelming responsibilities, guilt, and feeling like the world is stacked against you? You love yourself well when you make the choice for consciousness. Consciousness changes the way you view yourself and the way you view your life. Change is rarely easy; yet staying the same offers no relief from suffering. The choice for consciousness is challenging, but familiar suffering is painful--and it's a pain with no end in sight This book provides step-by-step support to help you release victim mentality; drop baggage and un-

healthy habits; and discard fear-based living. It will show you how to live as the creator of your life. This volume contains 16 tools and 137 definitions of terms and concepts to support your journey. The tools can be used in any order and are very powerful when combined with each other. The fear of change and the habit of staying small collaborate to say, "No, no, no, don't you dare change because that could be dangerous. Who knows what will happen if you change?" That's the moment when you have to take the risk of allowing yourself to walk the truth of you in the world. When you hear the voice that says, "No, no, no, I can't be that big. I can't shine my light that much. I can't emanate the truth of me to these people," that's the point when you need to say instead, "I want healing above all else. I want healing above all else. My desire for healing is stronger than my fear of what will happen if I shine my light, than my fear of how my truth will be received. My desire for healing is stronger than that. Emanation of the truth of me comes first." The Choice for Consciousness, Tools for Conscious Living series offers channeled messages from Elo-

heim and The Council. The Council is comprised of seven different groups: The Guardians, The Girls, The Visionaries, The Matriarch, The Eloheim, The Warrior, and Fred. During a channeling session, each of The Council members take turns sharing their teachings. Each Council member has a distinct personality, style of delivery, and focus. The Council is best known for their multitude of practical tools, which support the journey out of fear-based living into the consciousness-based operating system. The Choice for Consciousness, Tools for Conscious Living series is designed to offer step-by-step tools to support your movement out of the fear-based operating system into the consciousness-based operating system; to help you let go of baggage, static, and unhealthy habits; and to show you how to discard victim mentality, so that you can live fully as the creator of your life. Volume One of the series contained twenty-two tools that concentrated on the realization that you create your reality. This volume contains sixteen tools created to help you begin to LIVE as a creator. The tools can be used in any order and are very power-

ful when combined with each other. This book is not a narrative, but a reference text we hope you will return to again and again.

Dreaming humanity's future. There is nothing like the dream to create the future. Victor Hugo. Dream lofty dreams, and as you dream, so you shall become. Your vision is the promise of what you shall one day be; your ideal is the prophecy of what you shall at last unveil. James Allen. What is it we, as a human race, desire in the world? What dreams do we have to shape our future? Over 100 artists, activists, authors, educators, speakers, environmentalists, scientists, young entrepreneurs, visionaries, and Elders were asked for the following: A written description of your perfect world, or your dream world. This can be one sentence or many pages; a poem or researched essay. Your dream world can be as fantastic and marvelous as you want it to be. There are no rules, no right or wrong descriptions, only the world of your imagination and the world of your dreams.

Conscious Life Energy is the substance of the world and the Absolute is the source of the substance. The unity prior to

duality, yet immanent in it, is the shapeless root. It is That which does not depend on Consciousness, yet makes Consciousness possible. It is That wherein and whereof every 'I' appears and disappears. It is inconceivable for whoever attempts to conceive it. It is so clear that it is hard to see. Everything is this One displaying Itself in the multiplicity, this dance of interdependent counterparts, of presumed separate subjective self, presumed separate world, and presumed separate God. Phenomenal absence is 'I'. Everything is 'I-as'.

There are many books written on the need to change consciousness but rarely does anyone explore the depths of humanity's refusal to do so, even under threat of the approaching cataclysm in our refusal to deal with climate change. Dave MacQuarrie has written such a book. In it, he explains both why it is so difficult for us to change and what all of us can do to become more aware and more free of the darkness within. It is a superb book. Jim Garrison, President and CEO of Ubiquity University, and author of Civilization and the Transformation of Power. Acedia is a well-informed and in-

spired book about the historical and psychological origins of a centuries old affliction. Acedia masterfully connects the dots between personal psychological traumas and looming environmental collapse. Dr. MacQuarrie pulls no punches, yet offers a ray of hope that we just might save our future. Christian de Quincey, PhD, Professor of Philosophy and Consciousness Studies, John F. Kennedy University, and author of *Radical Nature: The Soul of Matter*. This is a wise, searching book by an authentic scholar and seeker. It helps us enter into the darker waters of our crisis, and find their treasures of dark wisdom and endurance. Andrew Harvey, poet, mystical scholar, Founder/Director of the Institute of Sacred Activism, and author of *The Hope: A Guide to Sacred Activism*. Dr. MacQuarrie has lifted the ancient monastic curse of acedia out of its medieval tomb and applied it aptly to the dis-ease of the contemporary world. His interpretation of the human resistance is perceptive and provides important insights into our present inclination to repudiate changes that demand action on our part. A serious and sensitive work. Father John-Julian, an Episcopal

priest and contemplative monk, translator of Julian of Norwich's *Revelations of Divine Love*.

The life force, also known as "spirit," is the essence of being and the conscious and most important form of energy. Living energy is personal and within our conscious control, and by learning about it, we can use it to transform our life into vibrant and meaningful expressions of who we really are. Consciousness is purely energetic and therefore difficult to quantify in mechanistic terms. It is the characteristic of living energy and is the foundation of awareness. Consciousness is the thread running through all life. Living Energy is an introduction to the process of mystic spirituality. The reader is encouraged to attain a deep and meaningful connection to the divine with expanded awareness. The principles given in this book are equally relevant to the novice and the advanced practitioner. Robert explains how we may reveal our hidden potential by shifting our perception away from what is customary and comfortable to open the doors to greater spiritual awareness.

This book is the result of

one person's spiritual odyssey after a lifelong dedication to the quest for truth. Within it Ivan Kovacs shares his insights with the reader with ever deepening realisations about what esotericists understand as spirituality. He explores those states of consciousness that are higher than that of the personality. He points out how we can reach out to ever deepening levels of consciousness - the divine birth right of every human being who makes a concerted effort to set his or her foot upon the spiritual path. In this book there are a variety of topics under discussion such as the Energy of Love, The Kundalini Syndrome, Christianity Judged from an Esoteric Perspective, and many more. The crowning achievement of the anthology is *The Path to Higher States of Consciousness*, in which an in-depth discussion traces the odyssey of consciousness from the personality to that of the soul, and from the soul to the Spiritual Triad, and then to the Monad, or that exalted level of consciousness known as Pure Being.

In the years since Daniel Dennett's influential *Consciousness Explained* was published in 1991, scientific research on conscious-

ness has been a hotly contested battleground of rival theories—"so rambunctious," Dennett observes, "that several people are writing books just about the tumult." With *Sweet Dreams*, Dennett returns to the subject for "revision and renewal" of his theory of consciousness, taking into account major empirical advances in the field since 1991 as well as recent theoretical challenges. In *Consciousness Explained*, Dennett proposed to replace the ubiquitous but bankrupt Cartesian Theater model (which posits a privileged place in the brain where "it all comes together" for the magic show of consciousness) with the Multiple Drafts Model. Drawing on psychology, cognitive neuroscience, and artificial intelligence, he asserted that human consciousness is essentially the mental software that reorganizes the functional architecture of the brain. In *Sweet Dreams*, he recasts the Multiple Drafts Model as the "fame in the brain" model, as a background against which to examine the philosophical issues that "continue to bedevil the field." With his usual clarity and brio, Dennett enlivens his arguments with a variety of vivid examples. He isolates the

"Zombic Hunch" that distorts much of the theorizing of both philosophers and scientists, and defends heterophenomenology, his "third-person" approach to the science of consciousness, against persistent misinterpretations and objections. The old challenge of Frank Jackson's thought experiment about Mary the color scientist is given a new rebuttal in the form of "RoboMary," while his discussion of a famous card trick, "The Tuned Deck," is designed to show that David Chalmers's Hard Problem is probably just a figment of theorists' misexploited imagination. In the final essay, the "intrinsic" nature of "qualia" is compared with the naively imagined "intrinsic value" of a dollar in "Consciousness—How Much is That in Real Money?"

Featuring 30 chilling stories of real-life zombie encounters, this comprehensive and unsettling study draws upon traditions found throughout the world to dispel common depictions of zombies as lurching, flesheating automatons made popular by countless movies and books. This fascinating collection includes the stories of the Devil Baby of Bourbon Street, a monstrous creature complete

with horns and tail that still lurks in the shadows of the Big Easy; Black Mama Courteaux and the great zombie war, involving hundreds of zombie soldiers battling for the supremacy of their queen; and the swamp child of Mama Cree, who still roams the bayous of Louisiana. In addition to the stories, a variety of zombie-related facts are explored, including ceremonies and initiations, zombies throughout history, sacred zombie and voodoo-related sites, and zombies and monsters of the Bible.

This edited collection brings together an introduction and 13 original scholarly essays on AMC's *The Walking Dead*. The essays in the first section address the pervasive blood-letting of the series: What are the consequences of the series' unremitting violence? Essays explore violence committed in self-defense, racist violence, mass lawlessness, the violence of law enforcement, the violence of mourning, and the violence of history. The essays in the second section explore an equally urgent question: What does it mean to be human? Several argue that notions of the human must acknowledge the centrality of the body—the fact that we share a “blind corporeality” with the zombie. Others address how the human is closely aligned with language and time, the disappearance of which are represented by the aphasic, timeless zom-

bie. Underlying each essay are the game-changing words of *The Walking Dead*'s protagonist Rick Grimes to the other survivors: “We're all infected.” The violence of the zombie is also our violence; their blind drives are also ours. The human characters of *The Walking Dead* may try to define themselves against the zombies but in the end their bodies harbor the zombie virus: they are the walking dead. Instructors considering this book for use in a course may request an examination copy here.

Writing in a rigorous, thought-provoking style, the author takes us on a far-reaching tour through the philosophical ramifications of consciousness, offering provocative insights into the relationship between mind and brain.

An exploration of consciousness in all matter--from quantum to cosmos • Outlines theories of consciousness in ancient and modern philosophy from before Plato to Alfred North Whitehead • Re-

veals the importance of understanding mind-in-matter for our relationships with the environment, with other people, even with ourselves Are rocks conscious? Do animals or plants have souls? Can trees feel pleasure or pain? Where in the great unfolding of life did consciousness first appear? How we answer such questions can dramatically affect the way we live our lives, how we treat the world of nature, and even how we relate to our own bodies. In this new edition of the award-winning *Radical Nature*, Christian de Quincey explores the "hard problem" of philosophy--how mind and matter are related--and proposes a radical and surprising answer: that matter itself tingles with consciousness at the deepest level. It's there in the cells of every living creature, even in molecules and atoms. Tracing the lineage of this idea through Western philosophy and science, he shows that it has a very noble history--from before Plato to Alfred North Whitehead. He reveals that the way to God is through nature and that understanding how body and soul fit together has surprising consequences for our relationships with our environ-

ment, with other people, and even with ourselves.

Is there a theory that explains the essence of consciousness? Or is consciousness itself just an illusion? The 'last great mystery of science', consciousness is a topic that was banned from serious research for most of the last century, but is now an area of increasing popular interest, as well as a rapidly expanding area of study for students of psychology, philosophy and neuroscience. This ground-breaking textbook by best-selling author Susan Blackmore was the first of its kind to bring together all the major theories of consciousness studies, from those based on neuroscience to those based on quantum theory or Eastern philosophy. The book examines topics such as how subjective experiences arise from objective brain processes, the basic neuroscience of consciousness, altered states of consciousness, out of body and near death experiences and the effects of drugs, dreams and meditation. It also explores the nature of self, the possibility of artificial consciousness in robots, and the question of whether animals are conscious. The new edition has been fully revised to include the lat-

est developments in neuroscience, brain scanning techniques, and artificial consciousness and robotics. The new website includes self-assessment exercises, advanced further reading, flashcards and MCQs. For all those intrigued by what it means to be, to exist, this book could radically transform your understanding of your own consciousness. LaConte's book offers a compelling answer to the now-universal question suggested by her subtitle. The global economy has gone viral. it is ravaging Earth's equivalent of an immune system the way HIV ravages the human immune system, triggering a Critical Mass of AIDS-like mutually reinforcing environmental, economic, social and political crises that are undermining the ability of human and natural communities to support, protect and heal themselves. LaConte's prognosis? Since Life rules, we don't, Life will last but Life as we know it-and a lot of us-won't. LaConte shows that Life learned two billion years ago how to deal with pathological economies: it put them out of business. it encoded in other-than-human species a set of Economic Rules for Survival that allow them to live

within Earth's means long term. In accessible prose LaConte explains how those rules can work for humans too. Recommended as a tool for community transition and cultural transformation, Life Rules offers a solution to our global crisis the publishers call "authentically conservative, deeply Green, and profoundly liberating."

Reality and Humean Supervenience confronts the reader with central aspects in the philosophy of David Lewis, whose work in ontology, metaphysics, logic, probability, philosophy of mind, and language articulates a unique and systematic foundation for modern physicalism.

Сегодня общепризнанно, что занятия йогой и медитацией эффективно способствуют снижению умственного и физического напряжения, и их практикуют миллионы жителей Западной Европы и Америки. Но немногие помнят, что не так уж давно такие занятия считались подозрительно эзотерическими или просто смехотворными. Однако общественный

интерес к базовым аспектам йоги заставляет все большее число людей пытаться понять, может ли медитация помочь читать мысли, передвигать объекты силой разума и предвидеть будущее. Автор, с позиции академического ученого, научного сотрудника Института ноэтических наук (IONS), раскрывает секреты таинственной Йога-сутры Патанджали, руководства по медитации двухтысячелетней давности, способной, согласно преданию, высвободить в нас сверхъестественные ментальные силы, такие как телепатия, ясновидение и предвидение. Возможно ли это? Наука отвечает: да.

A Different Dimension traces the historical development of an expanded, transpersonal view of consciousness-a view that sees the human mind as reaching beyond individual, personal consciousness into realms that we call "spiritual." It provides a rich and vital discussion of some of the most fundamental questions of our lives: questions about the nature and capacities of

the human mind, and its relation to ultimate realities. While scientifically informed, transpersonal thought challenges common assumptions of our dominant, materialistic intellectual consensus, which sees all consciousness as a product of brain function. While sympathetic to mystical experience, it seldom endorses mainstream systems of religious belief; rather, it provides intellectual substance to the trend referred to as Spiritual But Not Religious. Focusing on key figures and their semi-

nal ideas, Mark Ryan presents a clear and graceful account of this current in psychology, from before the discovery of the unconscious in the late 19th century, through the emergence of transpersonal psychology as an organized field in the late 1960s, to its reverberations in our contemporary world. For 22 years, Mark Ryan taught American Studies and History at Yale University, where he was the long-term Dean of Jonathan Edwards College. Subsequently, he

was Titular IV Professor of International Relations and History at the Universidad de las Americas, Puebla in Mexico, where he also served as Dean of the Colleges and Director of the graduate program in United States Studies. For 14 years a Trustee of Naropa University, he is certified as a practitioner of Holotropic Breathwork. Currently he teaches at the C.G. Jung Educational Center of Houston, the Wisdom School of Graduate Studies of Ubiquity University, and other venues.
