PREFACE TO STUDENTS A personal message from Lynn Troyka to students

Many of you as writers have much in common with me. Sure, I've been writing longer, so I've had more practice, and lots of rules are cemented in my head by this time (though some stubbornly refuse to stick, and I still need to look them up). Rather, our shared experiences during the act of writing define our commonalities. After all, we're each trying

to put into words ideas worthy of someone else's taking the time to read them. When I write, I'm often unsure of how to begin (starting in the middle and then working backward and forward usually helps). Not infrequently, I'm stuck for examples sufficiently effective to get my point across (running my thoughts past my friends can often get me going). Somewhat regularly, the precise expression that I'm looking for eludes me as I rummage through the clutter of words in my mind (using a thesaurus commonly helps me sort things out, as long as I attend to the subtle differences in meanings of synonyms). I offer this book to you as my partners in the process of writing, hoping that its pages suggest strategies that enhance your abilities to give voice to your thoughts. You're always welcome to write me at LQTBook@aol.com to express your reactions to my book and to share your own experiences as a writer. I'd like to end this message with a personal story. When I was an undergraduate years ago, handbooks weren't as common as they are now. Questions about writing nagged at me, and no one seemed to have the answer

I sought. One day, browsing through the library, I found a dust-covered book sitting on the wrong shelf. Its title included the words "handbook" and "writers." I read that book hungrily and often. Back then, I could never have imagined that someday I might write such a book myself. Now that I've completed the Simon & Schuster Quick Access Reference for Writers, Fourth Edition, I'm amazed that I ever had the nerve to begin. What this proves to me—and I hope to you—is that anyone can write. Students don't always believe that. I hope you will. With cordial regards, Lynn Troyka

When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better under-

stand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

"A fascinating collection of essays" by eminent historians exploring how we teach, remember, and confront the history and legacy of American slavery (Booklist Online). In recent years, the culture wars have called into question the way America's history of slavery is depicted in books, films, television programs, historical sites, and museums. In the first attempt to examine the historiography of slavery, this unique collection of essays looks at recent controversies that have played out in the public arena, with contributions by such noted historians as Ira Berlin, David W. Blight, and Gary B. Nash. From the cancellation of the Library of Congress's "Back of the Big House" slavery exhibit

at the request of the institution's African American employees, who found the visual images of slavery too distressing, to the public reaction to DNA findings confirming Thomas Jefferson's relationship with his slave Sally Hemings, *Slavery and Public History* takes on contemporary reactions to the fundamental contradiction of American history—the existence of slavery in a country dedicated to freedom—and offers a bracing analysis of how Americans choose to remember the past, and how those choices influence our politics and culture. “Americans seem perpetually surprised by slavery—its extent (North as well as South), its span (over half of our four centuries of Anglo settlement), and its continuing influence. The wide-ranging yet connected essays in [this book] will help us all to remember and understand.” —James W. Loewen, author of *Sundown Towns*

This qualitative case study investigated community college students' experiences with conducting research for academic papers in transfer-level composition courses at a rural community college. The problem stated in the study was as follows: Lit-

tle information exists on how rural community college students enrolled in transfer-level composition classes approach the process of searching for sources for an academic research paper; neither instructors nor librarians know if existing theoretical models match their students' experiences, what their students' academic research paper processes are, how students choose and evaluate information sources, or what major challenges and frustrations they encounter. The following research questions were posed: 1) What are the Yuba College English 1A students' research experiences when creating academic research papers? 2) What processes do students follow when conducting academic research? 3) How do students choose and evaluate their sources? 4) What challenges and frustrations might they encounter? This study was informed by information literacy theories, existing models of information-seeking behavior, and previous research on student use of online resources for research. The researcher collected thirty-four reflective essays from two sections of the English 1A class during Spring 2013, and conduct-

ed two focus group interviews with four participants each and three individual interviews during Fall 2013. Upon coding and analyzing data for emerging themes and recurring ideas, the following three major themes emerged: 1) Research Process, 2) Library and Help, and 3) Mental Process. The results were as follows: 1) Students struggled with finding, evaluating, and using sources for their research papers, 2) Respondents followed an established process in order to complete their research assignments, and 3) Study participants did not seek help throughout their research process. Recommendations for practical action are made for librarians, instructors, and community colleges. The study concludes with recommendations for future research to include other composition courses taught by other instructors, other courses, and urban community colleges. A collection of essays written by Samuel Clements (as Mark Twain.).

English writing is acknowledged as an essential skill for critical thinking, learning, and expression, and most EFL learners find themselves struggling when writing in English due to a lack of writing skills, content knowledge, writing strategies, intrinsic motivation, and fluency development practice. This edited volume, covering innovative approaches such as e-learning, strategy-based instruction, metacognitive training, a minimal grammar approach, writing assessment, and a genre-based approach, aims to innovate writing instruction in Chinese speaking regions, which has traditionally been characterized by rigid,

teacher-centered, test-oriented approaches. We aim for this edited volume to provide theoretical underpinnings as well as contemporary practical advice related to EFL writing instruction for Chinese speakers.

An exploration of why we play video games despite the fact that we are almost certain to feel unhappy when we fail at them. We may think of video games as being "fun," but in *The Art of Failure*, Jesper Juul claims that this is almost entirely mistaken. When we play video games, our facial expressions are rarely those of happiness or bliss. Instead, we frown, grimace, and shout in frustration as we lose, or die, or fail to advance to the next level. Humans may have a fundamental desire to succeed and feel competent, but game players choose to engage in an activity in which they are nearly certain to fail and feel incompetent. So why do we play video games even though they make us unhappy? Juul examines this paradox. In video games, as in tragic works of art, literature, theater, and cinema, it seems that we want to experience unpleasantness even if we also dislike it. Reader or audience reaction to tragedy is often ex-

plained as catharsis, as a purging of negative emotions. But, Juul points out, this doesn't seem to be the case for video game players. Games do not purge us of unpleasant emotions; they produce them in the first place. What, then, does failure in video game playing do? Juul argues that failure in a game is unique in that when you fail in a game, you (not a character) are in some way inadequate. Yet games also motivate us to play more, in order to escape that inadequacy, and the feeling of escaping failure (often by improving skills) is a central enjoyment of games. Games, writes Juul, are the art of failure: the singular art form that sets us up for failure and allows us to experience it and experiment with it. *The Art of Failure* is essential reading for anyone interested in video games, whether as entertainment, art, or education.

It is of utmost importance that believers carry the most important message, the gospel, into the world. To do that, a proper use of language is necessary. God gave the Scriptures through words, and to communicate His Word, the Christian must use words. Therefore, a proper use of language, both spoken and written, must be of concern especially for the person training for Christian service. Secondly, the examples used in this text provide a Christ-centered basis for interacting with the material. Major grammar areas that relate to good writing are the focus of the opening chapters with each chapter having exercises for the student to complete. The second section of the text focuses on sound principles of compo-

sition, giving students practice in various essay styles as well as research papers and form.

This OER textbook has been designed for students to learn the foundational concepts for English 100 (first-year college composition). In this inspirational yet practical book, the man Parade called "the most important coach in America," subject of the national bestseller *Season of Life*, Joe Ehrmann, describes his coaching philosophy and explains how sports can transform lives at every level of play, from the earliest years to professional sports. Coaches have a tremendous platform, says Joe Ehrmann, a former Syracuse University All-American and NFL star. Perhaps second only to parents, coaches can impact young people as no one else can. But most coaches fail to do the teaching, mentoring, even life-saving intervention that their platform provides. Too many are transactional coaches; they focus solely on winning and meeting

their personal needs. Some coaches, however, use their platform. They teach the Xs and Os, but also teach the Ys of life. They help young people grow into responsible adults; they leave a lasting legacy. These are the transformational coaches. These coaches change lives, and they also change society by helping to develop healthy men and women. InSideOut Coaching explains how to become a transformational coach. Coaches first have to "go inside" and articulate their reasons for coaching. Only those who have taken the InSideOut journey can become transformational. Joe Ehrmann provides examples of coaches in his life who took this journey and taught him how to find something bigger than himself in sports. He describes his own InSideOut experience, starting with the death of his beloved brother, which helped him understand how sports could transcend the playing field. He gives coaches the information and the tools they need to become transformational. Joe Ehrmann has taken his message about the extraordinary power of sports all over the country. It has been warmly endorsed by NFL head coach-

es, athletic directors at major universities, high school head coaches, even business groups and community organizations. Now any parent-coach or school or community coach can read Ehrmann's message and learn how to make sports a life-changing experience.

Library authorities address the increasing significance of reference services and the increasing need for evaluation of those services to further ensure professionalism and efficiency.

This book is a history composed of histories. Its par-

ticular focus is the way in which computers entered and changed the field of composition studies, a field that defines itself both as a research community and as a community of teachers. This may have a somewhat sinister suggestion that technology alone has agency, but this history (made of histories) is not principally about computers. It is about people—the teachers and scholars who have adapted the computer to their personal and professional purposes. From the authors' perspectives, change in technology

drives changes in the ways we live and work, and we, agents to a degree in control of our own lives, use technology to achieve our human purposes. REVIEW: . . . This book reminds those of us now using computers to teach writing where we have been, and it brings those who are just entering the field up to date. More important, it will inform administrators, curriculum specialists, and others responsible for implementing the future uses of technology in writing instruction. - Computers and Composition
