## OI79ET - HAROLD DAVIES

---

To discover which IP addresses your computer has, you use the ip command with the object address. The default action is show, which lists the IP addresses. You can also omit show and abbreviate address as "addr" or even "a.". The following commands are all equivalent: ip address show. ip addr show.

Updated for Intel® Quartus® Prime Design Suite: 20.1. The Avalon® Verification IP Suite is a collection of bus functional models (BFMs) and monitors that facilitate the verification of IPs. The provided BFMs cover Avalon® Streaming and Avalon® Memory Mapped interfaces as well as the conduit interfaces and Avalon® Tri-State conduit interfaces.

NOOP command—Return a 250 OK return code when SMTP is responding; QUEU command—Get information about mail queued at SMTP for delivery; QUIT command—End an SMTP connection; RCPT TO command—Specify the recipients of the mail; RSET command—Reset the SMTP connection to the initial state; TICK command—Insert an identifier into

the batch SMTP response data set

To view the list of core files in the core file system, use the dir core command. To save a copy of a core dump to a remote server before clearing it, use the copy capture command. To delete a specific core dump file from the core file system, use the delete core command. Note The SAMI creates a core dump when it experiences a fatal error.

z/OS Communications Server: IP User's Guide and Commands Describes the end user functions and commands supported by IP, such as Telnet, FTP, and SMTP.
