## LESV2Z - HUERTA CUNNINGHAM

---

This early work by Guy de Maupassant was originally published in the 1880's. Guy de Maupassant was born in 1850 at the Château de Miromesnil, near Dieppe, France. He came from a prosperous family, but when Maupassant was eleven, his mother risked social disgrace by trying to secure a legal separation from her husband. After the split, Maupassant lived with his mother till he was thirteen, and inherited her love of classical literature. In 1880, Maupassant published his first - and, according to many, his best - short story, entitled 'Boule de Suif' ('Ball of Fat'). It was an instant success. He went on to be extremely prolific during the

1880s, working methodically to produce up to four volumes of short fiction every year. Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions.

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed" characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1972. Organized by

year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.
