Wright Brothers - HISTORY

Our Story - Wright Brothers

Chronicling their lives from their early mechanical work on toys and bicycles through the development of several flyers, The Wright Brothers follows the siblings through their achievement--not only the first powered, sustained, controlled airplane flight, but the numerous improvements and enhancements that followed, their revolutionary airplane business, and the long legacy of that first brief flight.

The Wright Brothers is a 2015 non-fiction book written by the popular historian David McCullough and published by Simon & Schuster. It is a history of the American inventors and aviation pioneers Orville and Wilbur Wright. The book was on The New York Times Non-Fiction Best Sellers list for seven weeks in 2015.

The Wright Model A was an early aircraft produced by the Wright Brothers in the United States beginning in 1906. It was a development of their Flyer III airplane of 1905. The Wrights built about seven Model As in their bicycle shop during the period 1906-1907 in which they did no flying.

The Wright brothers did things together from the time they were small boys. The Bicycle Business The Wright brothers went into the printing business together in 1889. Three years later, they opened their first bicycle shop. Initially, they sold and repaired bicycles. They would replace spokes, fix broken chains, and sell accessories.

NASA - The Wright Brothers' Story

The Wright brothers built a movable track to help launch the Flyer. This downhill track would help the aircraft gain enough airspeed to fly. After two attempts to fly this machine, one of which resulted in a minor crash, Orville Wright took the Flyer for a 12-second, sustained flight on December 17, 1903.
